Serving size (gram or fl. oz): _____

Serving Per Container: _____

*Required for products that are larger than a single serving, but that can be consumed in one or multiple settings.

NOTES: *Minimum sample size of 1 pound(454g) if solid sample/16 fl. oz. if liquid sample

FDA regulations state that a sample for nutrient analysis shall consist of a composite of 12 subsamples (consumer units), taken 1 from each of 12 different randomly chosen shipping cases, to be representative of a lot.

****Please submit an ingredient list upon sample submission.**

The new 2016 changes to the Nutrition Facts Label by FDA have carefully defined servings sizes to be used on all products. We have made every effort to provide you with NUTRITION FACTS information which complies with the new nutrition law to date. Verify for compliance your serving size and serving(s) per container, including "dual column" servings if needed.
The amount of certain non-digestible oligosaccharides that do not meet the dietary fiber definition and added sugars cannot be determined analytically. Therefore, these declarations depend exclusively on information provided by you, the customer. Please note that under the new regulations, the manufacturer is ultimately responsible for these values, and must make and keep records to verify the amount of sugars and dietary fibers, added to their food.
